Challenges

Integrating current available technologies such as Google Earth, Database software, Web site, socials for marketing such as Facebook, Viber, IG, etc. There are farm app/software available in the market but most of them are a little complex and some not
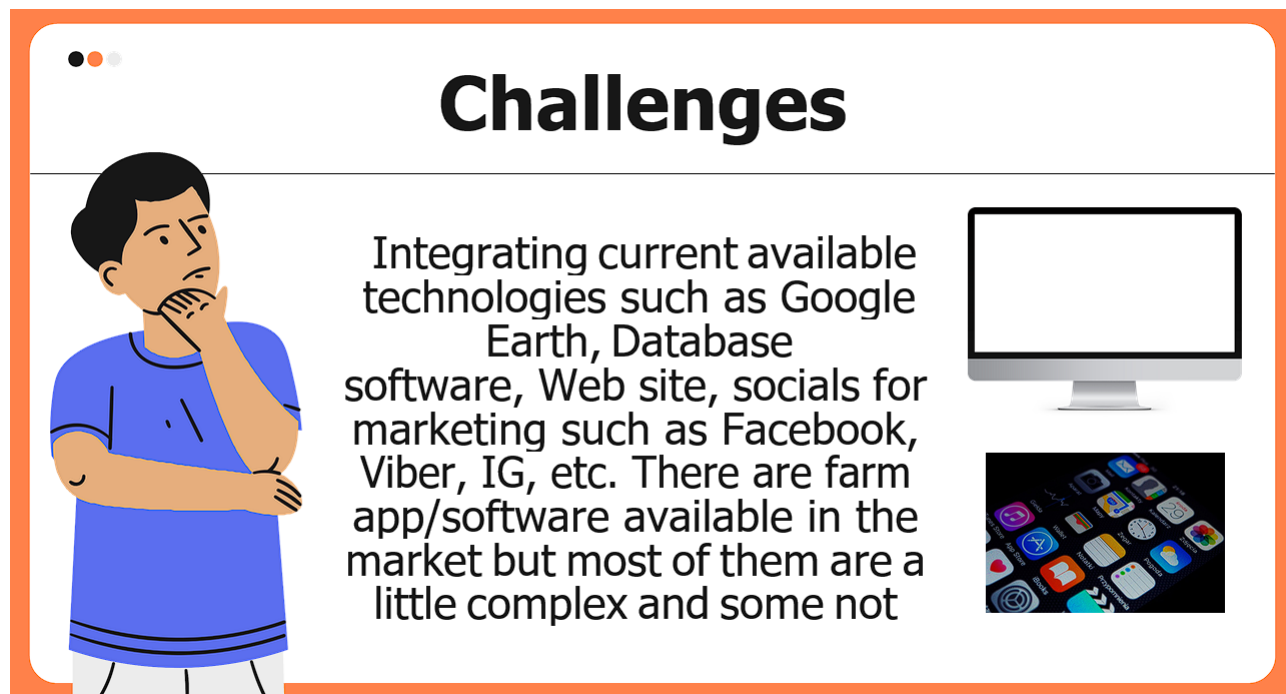

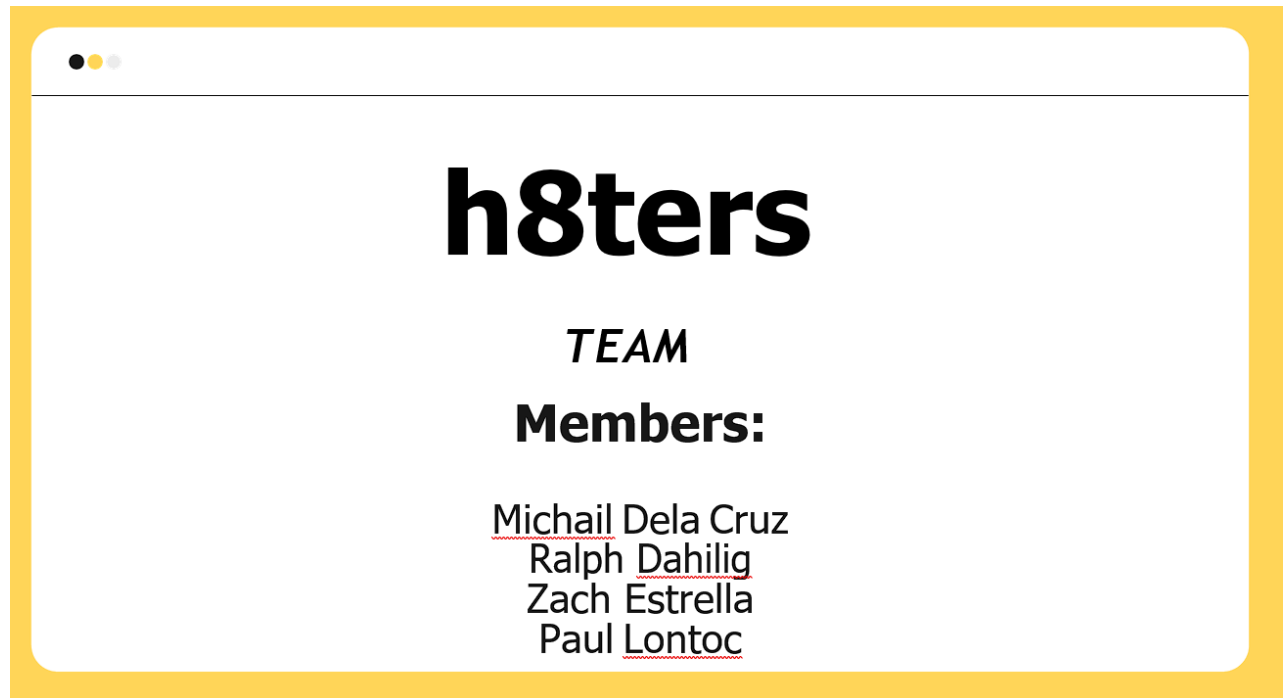

# i-Agri

Proposed solution

What is iAgri?

- A web-based platform that help companies and organizations associated with the agricultural sector in the Philippines in storing, maintaining, and keeping their personal records in a secure and organize way.

- Business processes and functions ranges from trade, importation, exportation and the need for supplies of the products including fresh animal produce, vegetables and fruits supplied to various local supermarkets and restaurants.
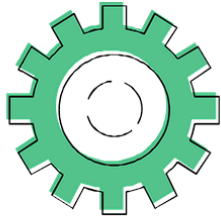

To enable farm businesses easily adapt and connect to the digital world across the nation

Mission

To create useful features and functionalities for farmers that informs and eases their processes and activities

Vision

Features and Functionalities

- Inventory management system
- Automated farm processes
- Digitized transactions/logs
- Social media presence for potentialpartners
